DETAILED ACTION

Specification

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Rejections - 35 USC § 112

Claims 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 6 recites the broad recitation phenylsulfonyl halide, and the claim also recites a TIPPS halide which is the narrower statement of the range/limitation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 00/04954 to Wilhelm et al (US equivalent 6,624,169 B1).

Wilhelm teaches a process for preparing 1. N.alpha.-2,4,6-triisopropylphenylsulfonyl-(L)-3-amidinophenylalanine 4-ethoxycarbonylpiperazide hydrochloride. 5 g of (L)-3-cyanophenylalanine methyl ester were suspended in 100 ml of dioxane, 4.45 ml of N-methylmorpholine (NMM) were added and the mixture was stirred for 30 min. After adding 5.97 g of 2,4,6-triisopropylbenzenesulfonyl chloride in solid form and subsequent stirring for 3 days, precipitated NMM-HCl was filtered off, the solvent was distilled off and the crude product obtained was purified on silica gel (SG) 60 (chloroform). Yield: 8.34 g of syrup (90%). See Examples.
